# Sinux Inverters

Sinux Inverters

SINUX is a range of 12/24/48/110 Vdc INVERTERS with a 230 Vac 50Hz sinewave output. The output is galvanically isolated thanks to a built in transformer. The inverters are very efficient and have a wide input voltage window, that allows them to be used directly with photovoltaic (solar) panels.

## CHARACTERISTICS

- Standard galvanic isolation: the system has a built in transformer to ensure galvanic isolation.
- Wide input voltage range: the inverters have a wide input range and are compatible with photovoltaic systems and do not require extra regulation hardware
- Full diagnostics: the inverters provide both visual and audible status and diagnostic information
- Built-in protection. Protection includes: over and under voltage, reverse polarity, overloads, short circuits and over temperature
- Automatic restart: the inverters auto restart when the alarm condition is resolved
- Optional bypass
- Optional LCD display
- Dry contacts interface board:
  - standard: dc voltage present; dc voltage low
  - optional: overload; inverter fault; overtemperature
- Special versions available on request
- Compatible options available on request

S12 - S24 - S48 - SK1
